

8th Grade World Geography Course Description

Course Description:

A survey course of all the continents that starts with the study of the relative location of the countries of the world. After that students will dive into the physical and cultural characteristics of each region with a focus on natural landscape, linguistic, religious, culinary, economic, historic and environmental traits. A collaborative and passion based component of the class each helps students prepare for the assessments which will test a student's ability to demonstrate understanding of how geographic characteristics impact human behavior.
